

## CASE STUDY

### Transmission of fixed telephone lines from Asaluye Telecommunication Center to Companies located in PSEEZ

Due to the strategic importance of Asaluye region, it is vital to have reliable and secure transmission of telephone lines from telecommunication centers to operating companies in the PSEEZ.

#### Project:

Lack of cabling infrastructure for fir fixed telephone lines

Establishing secure, reliable telephone lines to clients in dispersed locations.

#### Solution:

By utilizing Redline wireless & Voice Gateways (Audio Codes) equipments, Tavanesh has transmitted more then 700 lines from the telecommunication centers to client offices. Contributing to the expansion of the telecommunication network in the region.

#### Result:

Development of the telecommunication infrastructure in PSEEZ

Telephone line transmission services for clients, in a remote & isolated strategic location, without a telecommunication infrastructure in place.

Tavanesh was launched, with the primary aim to provide solutions, consultations, sales, installation, implementation and technical support services for Telecommunication, Satellite, Wireless, LAN and WAN computer networks and equipments. In the short time since the start off, Tavanesh has been able to fully realize the predetermined goals of the company.

Tavanesh offers a wide range of services in the design, installation, implementation and data security, for further information on the wide range of services and products, please visit our website.
