

CASE STUDY

Design & Implantation of PSEEZ Campus Wireless LAN

Campus Wireless LAN project was commissioned by Pars Special Economic Energy Zone (PSEEZ), in order to provide users with Wireless Internet Access at their Dormitories.

Project:

Wireless Network to provide users with Internet Access in dormitories and the compound.

Rapid Installation and quick Service Set up

Solution:

After a series of studies, the project was designed on Senao Indoor/Outdoor Access Points.

Result:

Solid Network Connection for the Users.

Low Cost & High Speed in installation & implementation.

Tavanesh was launched, with the primary aim to provide solutions, consultations, sales, installation, implementation and technical support services for Telecommunication, Satellite, Wireless, LAN and WAN computer networks and equipments. In the short time since the start off, Tavanesh has been able to fully realize the predetermined goals of the company.

Tavanesh offers a wide range of services in the design, installation, implementation and data security, for further information on the wide range of services and products, please visit our website.
